

BRMS Enhances Client Offerings Through HealthJoy's Expanded Virtual MSK Program

MyHealthGuide Source: BRMS, 8/25/2025

Folsom, CA -- BRMS, an independent Third-Party Administrator with over 30 years of sustained growth and innovation, is excited to announce that through our continued partnership with HealthJoy, their Virtual MSK Program is now available to all BRMS clients.

With many BRMS clients having already experienced great success through HealthJoy's proven MSK program over the years, extending the program to all clients as a standalone product is just one of the many ways BRMS and HealthJoy are working together to enhance solutions and offerings. No matter where an individual is in their MSK journey, the program serves as a virtual solution for a wide range of musculoskeletal (MSK) needs--offering personalized guidance and exercise therapy made easily accessible from the comfort of your home.

"BRMS and HealthJoy have had a successful long-term partnership in the benefits navigation space for years, one that has brought positive results for both BRMS clients and plan members through their proactive virtual healthcare solutions," said **Luke Schafer**, Executive Vice President at BRMS. "We look forward to continuing that partnership and strengthening our offerings for all clients through their MSK services. With another high-tech, proactive, and sophisticated solution as part of our end-to-end services, we hope to tackle an issue that plagues millions of Americans and drives significant healthcare spending."

If members are struggling with pain, recovering from surgery, or want to prevent future pain and injury, they can seek help with HealthJoy by simply opening the app, answering a few questions, and communicating with a personal coach. Rated with an 82% in pain reduction, 85% in function improvement, and a Net Promoter Score (NPS) of 88, BRMS is proud to enrich our wellness initiatives with the added expansion of HealthJoy's Virtual MSK Program.
